MANISH CHOUHAN

PROJECT MANAGER & TECHNICAL PRODUCT LEADER

+91 89056 94021 • manishchouchan123@gmail.com • Sojat Road, Pali, Rajasthan • manish.devoq-labs.online •

LinkedIn: Manish Chouhan

PROFESSIONAL SUMMARY

Results-driven Project Manager, AI Automation Associate, and Technical Builder combining rigorous management principles from Harvard University with advanced technical foundations from IIT Madras. Proven track record of leading cross-functional teams, directing end-to-end project lifecycles, and deploying scalable AI-driven automation workflows and enterprise web applications.

PROJECT MANAGEMENT & CORE COMPETENCIES

Project Methodologies:	Agile Project Management, Sprint Planning, Scrum, Risk Assessment, Resource Allocation
AI & Workflow Automation:	AI Automation, Prompt Engineering, OpenAI APIs, Process Optimization, Pipeline Integration
Technical Stack:	Python, TypeScript, JavaScript, React.js, Next.js, Fastify, Prisma, PostgreSQL, AWS
Business & Operations:	Strategic Planning, Client Communication, Technical Documentation, Product Lifecycle Management
Technical & Systems:	Git & GitHub, Docker, REST API Architecture, Node.js & Express, SQL, Supabase, Google Cloud Platform, FastAPI, TensorFlow, Power BI, Advanced Excel

PROFESSIONAL EXPERIENCE

AI Automation Associate | **Pixellab.Media** Sep 01, 2026 – Present

- Design and implement AI-driven automation workflows to streamline operational pipelines and enhance project delivery speed.
- Integrate advanced language models and APIs into digital ecosystems to optimize media workflows and business efficiency.

Founder & Project Director | **Devoq Labs** Jun 2025 – Present

- Direct end-to-end project lifecycles for web development, AI integration, and digital transformation initiatives, managing timelines and scope.
- Coordinate cross-functional teams of developers and designers, aligning resource allocation with client business milestones.
- Supervise end-to-end delivery milestones, coordinating client reviews, sprints, task priorities, and deployment logs across customized AI endpoints and web platforms.

Project Manager | **JJGillespie.com** Nov 2025 – Present

- Manage distributed project schedules, deliverables, and cross-team communications to ensure strategic alignment with organizational objectives.
- Implement workflow improvements and milestone tracking that boost team productivity and delivery speed.
- Bridge communications between commercial project stakeholders and technical execution teams to maintain clear task delegation pipelines and milestone tracking.

Associate Project Manager Intern | **Excelerate** May 2025 – Jun 2025

- Assisted in planning, tracking, and executing deliverables while maintaining strict quality assurance and timeline constraints.
- Assisted senior management in mapping project milestones, organizing project documentation backlogs, and preparing sprint review dashboards.

Core Team Operations Manager | **Paradox, IIT Madras** 2026

- Managed event operations, large-scale logistics, and participant engagement for a flagship institutional event under strict deadlines.
- Coordinated operations and corporate brand relations for the flagship annual student symposium, directing an on-ground logistics sub-group managing operations for 2,000+ national student delegates.

Python Programmer Intern | **Codveda Technologies** 2025

- Wrote and optimized automated scripting pipelines in Python for processing text datasets and indexing directories.
- Collaborated closely with code leads to resolve issues, write modular scripts, and maintain code versioning using Git repository workflows.

KEY PROJECTS & TECHNICAL LEADERSHIP

KEY PROJECTS & TECHNICAL LEADERSHIP (CONTINUED)

Mind Mitra – AI-Powered Mental Health Platform *Tech: Lovable AI, UI/UX*

- Spearheaded product conceptualization and development of a scalable mental health platform with dual-user dashboards.
- Developed an AI counseling companion utilizing natural language processing pipelines to deliver real-time emotional support and cognitive coping techniques.

AgriBuddy – Smart Crop Pathogen Diagnosis Pipeline (Prototype) *Tech: Python, TensorFlow, FastAPI*

- Developed an agro-tech prototype pipeline using computer vision designed to diagnose crop plant pathogens and leaf diseases from uploaded photos.
- Configured a FastAPI service interface to process image inputs and serve diagnostic guidance for common agricultural conditions.

Devoq Labs Speech Services – Voice Synthesis & Audio Processing Gateway *Tech: Node.js, Express.js, Google Cloud Speech-to-Text, AI33.pro TTS, Docker*

- Engineered a centralized microservice gateway integrating Google Speech-to-Text with AI33.pro Text-to-Speech endpoints for automated voice synthesis.
- Implemented client API key authentication, request validation, and containerized deployment workflows using Docker.

HBB Mutation Analyzer – Genomic Variant Research Tool (Prototype) *Tech: Python, HGVS Parsing, ClinVar API, PubMed API, Google Gemini API*

- Designed a bioinformatics prototype to parse human Beta-Globin (HBB) gene variants using standard HGVS nomenclature and extract codon consequences.
- Aggregated variant classifications from NCBI ClinVar and literature citations via PubMed API, integrating Gemini AI to generate structured research summaries.

EDUCATION & CREDENTIALS

EDUCATION

Bachelor of Liberal Arts (Business Administration Mgmt)
Harvard University

BS in Data Science & Applications
IIT Madras | 2025–2029

CERTIFICATIONS & TRAINING

Credential of Leadership, Impact, & Management
Team Leadership, Strategy, Finance, Digital World

Google Ads Apps & Play Academy
Google Certification

AWS Job Roles in Cloud & ML Prep
Amazon Web Services
